ABSTRACT

The article presents a descriptive approach to the organizational performance of the scientific journals Orbis and Negotium. The methodology was based on the research of the hemerographic sources existing on the web. The records were identified and processed by downloads. Indexing, evaluation, recommendation, appointments and visits via clustmaps. They were recorded in control cards, processed manually and digitally to build tables, diagrams and charts. As a corollary we have that Orbis and Negotium totalize according to Redalyc more than 400,000 downloads from 2013 to 2016; authors from Mexico, Venezuela, Nicaragua, Spain, Argentina, Brazil, Colombia, Cameroon, Sri Lanka, Turkey, Indonesia and India having as main consumers Venezuela, Mexico, Germany, the United States, China and Peru, those located between the journals of greater push and organizational performance in the scientific area in the global context.

Keywords: organizational performance, scientific area; scientific journal.

RESUMEN

El artículo presenta una aproximación descriptiva del desempeño organizacional de las revistas científicas Orbis y Negotium. La metodología se basó en la pesquisa de las fuentes hemerográficas existentes en la web. Se identificaron y procesaron los registros por descargas. Indexación, evaluación, recomendación, citas y visitas vía clustmaps. Se registraron en fichas de control, se procesaron de forma manual y digital para construir las tablas, esquemas y gráficos. Como corolario tenemos que Orbis y Negotium totalizan según Redalyc más de 400.000 descargas de 2013 a 2016; autores procedentes de México, Venezuela, Nicaragua, España, Argentina, Brasil, Colombia, Cameroon, Sri Lanka, Turkey, Indonesia e India teniendo como principales consumidores Venezuela, México, Alemania, Estados Unidos, China y Perú, que las ubicadas entre las revistas de mayor empuje y desempeño organizacional en el área científica en el contexto mundial.

Palabras clave: desempeño organizacional, área científica; revistas científicas.

METHODOLOGY AND BASIC DEFINITIONS

The methodology is descriptive based on the research and collection of the existing newspaper sources on the web, namely Redalyc.org, Academic Search Premier, Academic Plus, IBZ Online, Dialnet, Latindex and Latindex Catalog, Doaj, Erihplus, Class, Actualidad Iberoamericana, MIAR and Emerging Sources Citation Index among others. The records were identified and processed by downloads, indexing, evaluation, recommendation, appointments and visits via clustmaps. They were recorded in control cards, processed manually and digitally to build tables, diagrams and charts. The records for the journals were made individually, as well as the presentation of the same.

For purposes of the research is understood as organizational performance the different measurements of identification, registration, downloads, indexing, assessments, recommendations, appointments and visits exposed directly or indirectly on the website of scientific journals by academia, repositories and international indexes to standardize and standardize world quality and scientific production.
